

Audi S6 Avant/Limousine (C7)

Product Name: **Evolution Line (Titanium)**

Product code: **S-AU/TI/6H**

Approval: ECE

MSRP ex. VAT: 6.293,09 €

INFO

The Audi S range of cars features high-performance V8 engines that are a perfect match for the Akrapovič Evolution exhaust systems. Styled and designed in-house by Akrapovič's engineers, the Audi S range of Evolution exhausts include valves that are steered through electric actuators designed to alter their position depending on the vehicle's driving program and the driver's style. They can also be changed in the car's individual program settings. The addition of an Evolution exhaust will increase power and torque levels, while decreasing weight and adding the unique Akrapovič sound. Evolution exhausts give the car a noticeably different character, with a deep sound at lower revs and a sportier note as the revs rise. With four, superbly styled round carbon-fibre tailpipes, the Evolution system looks as good as it works on Audi S models. This cat-back performance exhaust system leaves the stock catalytic converters in place, so there is no need to remap the ECU. Its easy-to-fit instructions make installation a simple, plug-and-play task.
