## INFO

---

The performance exhaust for the McLaren MP4-12C is a high-tech system crafted from a special durable and heat-resistant titanium alloy with bigger tubes and unique solutions to improve torque and power at all rpms, especially in the most-used middle range. Our uncompromising approach uses the best materials and design. Light systems save weight and lower the center of gravity, leading to better handling as well. A special coating guarantees a state-of-the-art look. The 12C with the Akrapovič Slip-On exhaust system sounds deeper in the low rpms and serves up a delicious racing sound as the revs get higher. Slip-On systems contain special sound solutions to tune the sound frequencies: every element of the system was designed for maximum sound output, and offers everything needed for pleasant cabin comfort and to make the V8 sing out for true car enthusiasts at all rpms in all gears. On top of all this, the carbon fibre tailpipes create the striking visual impression that this is no ordinary McLaren.

THIS PRODUCT DOES NOT MEET EMISSION COMPLIANCE REQUIREMENTS FOR STREET OR HIGHWAY USE.
