

# Mercedes-AMG C 63 Coupé (C205)

Product Name: **Evolution Line (Titanium)**

Product code: **MTP-ME/T/3H**

Approval: ECE

**MSRP ex. VAT: 4.416,60 €**

## INFO

Perfectly formed using specially developed ultra-lightweight titanium alloys and finished with hand-crafted matte carbon-fibre tailpipes. The system replaces both the base and performance exhausts fitted to the Mercedes-AMG C 63 and C 63 S. This stunning system includes parts cast in the company's in-house foundry, featuring an active X connection and an additional pair of exhaust valves behind the rear mufflers, designed to provide optimal control of the exhaust sound for the best aural enjoyment. With two defined sound characteristics and three different driving sound settings, the system has been perfectly tuned to deliver the very best sound in all modes. The optional Akrapovič Sound Kit controller allows the user to choose the exhaust tone regardless of the chosen mode of the vehicle and is a recommended upgrade when replacing the base exhaust system. An increase in performance and torque and a huge weight savings in excess of 45% makes this a very serious performance upgrade. Because it is ECE type approved with no need to remap the ECU or add any other parts, it is just a simple plug-and-play installation. The exquisite Akrapovič Evolution Line (Titanium) exhaust system adds performance and style, along with an amazing soundtrack.

Because of packaging requirements, the EVO system has been split into two codes. Please be aware that both part numbers (MTP-ME/T/3H and E-ME/T/3) must be ordered.

If the Akrapovič Evolution Line system replaces the Mercedes-AMG performance exhaust system, the Valve Actuator Kit (P-HF985) is not needed. The valves on the exhaust can be controlled from the car cabin. The Akrapovič Sound Kit (P-HF949) can be purchased as an optional part. If the car is not equipped with a performance exhaust but with the basic Mercedes-AMG exhaust system, then the Valve Actuator Kit (P-HF985) is mandatory. The Akrapovič Sound Kit (P-HF949) is also highly recommended for complete control over exhaust sound regulation. If the car is already equipped with exhaust valve button inside the cabin, sound kit is not needed.

&#65279;Fittment notice: This system does not fit on vehicles equipped with Otto particulate filter (OPF).&#65279;
