INFO

The Clio R.S. is known as a real "hot hatch" among small cars. Akrapovič offers a Slip-On exhaust system in stainless steel with a two-muffler design and exquisitely designed and manufactured tailpipes. The Slip-On gives the Clio R.S. additional power and torque, and reduces the weight. The system also improves the driving characteristics at practically all rpms and gives the 2-liter engine that distinctive Akrapovič sound. In addition to the power gains resulting from weight reduction and a better power-to-weight ratio, leading to increased power, a Clio RS with an Akrapovič exhaust system can be distinguished even from afar thanks to its precision-crafted carbon fibre tailpipes. The Akrapovič Slip-On markedly improves the driving experience.
